

Principal Real Estate Income Fund (PGZ)

Fund Update

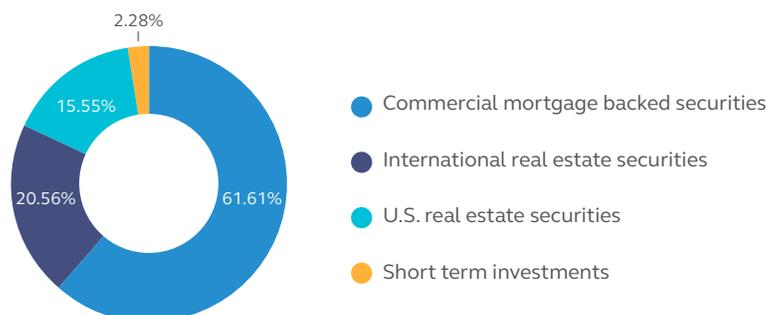

October 31, 2017

All data as of 10/31/2017

The Principal Real Estate Income Fund seeks to benefit from the recovery in commercial real estate markets by investing in higher-yielding debt and equity commercial real estate-related investments.

- Seeks to provide high current income as the primary objective with capital appreciation as a secondary objective
- Potential for attractive current income provided by allocation to debt securities while equity allocation offers income with potential capital appreciation
- Dynamic investment strategy provides flexibility to position the Fund for success based on the market outlook of the Fund's investment sub-adviser

Sector allocations (% of total portfolio)

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance data may be higher or lower than actual data quoted. For the most current month-end performance data please call 855.838.9485.

Total annual expense ratio as a percentage of net assets attributable to common shares including interest expense, as of October 31, 2016, 2.82%.

Total annual expense ratio as a percentage of net assets attributable to common shares excluding interest expense, as of October 31, 2016, 2.07%.

¹ Total returns assume reinvestment of all distributions.

² Fund inception date of June 25, 2013.

³ Performance returns are net of management fees and other Fund expenses.

⁴ Market price is the value at which the Fund trades on an exchange. This market price can be more or less than its NAV.

Manager commentary

Broad market sentiment remained positive in October as indicators point to generally synchronized global economic expansion. In the US, advance third quarter GDP came out stronger than expected at 3.0%, despite the impacts of three major hurricanes. While the US Federal Reserve has begun implementing their balance sheet roll-off plan, other central banks around the world remain highly accommodative. On the fiscal front, proposed US tax reform could produce stimulative effects in the near-term. Against this backdrop, the portfolio's holdings of Commercial Mortgage-Backed Securities (CMBS) and global real estate securities posted monthly returns of -0.1% and 0.0%, respectively (return figures reported on a gross, unlevered basis).

Years of central bank quantitative easing, low rates, and a relentless hunt for yield have resulted in a compression of risk premiums across the global investment landscape. Building confidence around global economic expansion and a general scarcity of higher yielding investment options is supportive of demand for debt and equity commercial real estate investments. Property fundamentals and capital market conditions remain supportive; however, downside scenario analysis and disciplined security selection remain critical.

Periods of macro volatility, heightened geopolitical risk, an emergence of growth concerns, rising rates (especially in longer maturities), and/or weak market technicals could negatively impact the portfolio. Conversely, a restrained longer-term interest rate outlook, a continuation of synchronized global economic growth (albeit slow), generally balanced supply/demand fundamentals, and property-level income growth may benefit longer-term performance.

Distribution details

Current distribution (monthly)	\$0.110
Annualized distribution rate	7.72%

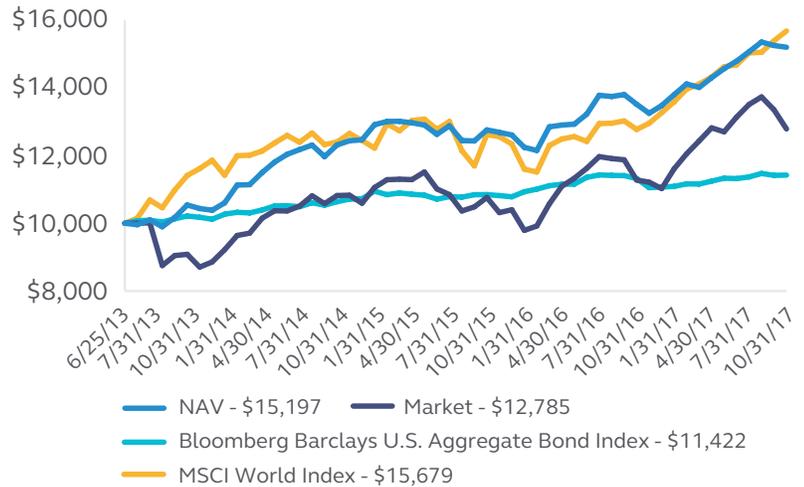

Distributions may be paid from sources of income other than ordinary income, such as net realized short-term capital gains, net realized long-term capital gains and return of capital. Based on current estimates, we anticipate the current distribution has been paid from ordinary income. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. If a distribution includes anything other than net investment income, the Fund provides a Section 19(a) notice of the best estimate of its distribution sources at that time. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year. The annualized distribution rate is the monthly per share distribution times 12, divided by the end-of-month market price.

Portfolio details

Net assets	\$133.89 million
Number of holdings	138
Non-domestic holdings (%)	20.56%
Wtd. avg. debt security coupon ¹	4.30
Wtd. avg. debt security market price ²	76.43
Wtd. avg. equity security dividend yield ³	5.01%
Leverage ratio**	30.92%
Annualized cost of leverage	1.53
Wtd. avg. debt security average life ⁴	5.62
Wtd. avg. debt security duration ⁵	4.29

¹ Represents the weighted average annualized coupon of the portion of the portfolio invested in debt securities, excluding interest-only securities. ² Represents the weighted average market price of the portion of the portfolio invested in debt securities, excluding interest-only securities. ³ Represents the weighted average annualized dividend yield of the portion of the portfolio invested in equity securities. ⁴ Represents the weighted average average life of the portion of the portfolio invested in debt securities. ⁵ Represents the weighted average modified duration of the portion of the portfolio invested in debt securities.

Important risks

An investment in the Fund is not appropriate for all investors and is not intended to be a complete investment program. The Fund is designed as a long-term investment and not as a trading vehicle.

Investing in the Fund involves risks, including the risk that you may receive little or no return on your investment or that you may lose part or even all of your investment. Therefore, before investing you should carefully consider the risks that you assume when you invest in the Fund's common shares. Securities backed by commercial real estate assets are subject to securities market risks similar to those of direct ownership of commercial real estate loans including, but not limited to, declines in the value of real estate, declines in rental or occupancy rates and risks related to general and local economic conditions.

The Fund's investment objectives and policies are not designed to seek to return the initial investment to investors that purchase shares.

Investing in the Fund involves risks, including exposure to below-investment grade investments (i.e., "junk bonds"). The Fund's net asset value will vary and its distribution rate may vary and both may be affected by numerous factors, including changes in the market spread over a specified benchmark, market interest rates and performance of the broader equity markets. Fluctuations in net asset value may be magnified as a result of the Fund's use of leverage. Shares of closed-end investment companies frequently trade at a discount from their net asset value and initial offering prices. The risks associated with this characteristic of closed-end investment companies may be greater for investors expecting to sell their shares in a relatively short period after completion of the initial public offering. For further discussion of these and additional risks associated with an investment in the Fund see the Prospectus.

The Fund is a closed-end fund and does not continuously issue shares for sale as open-end mutual funds do. The Fund trades in the secondary market. Investors wishing to buy or sell shares need to place orders through an intermediary or broker. The share price of a closed-end fund is based on the market's value.

Bloomberg Barclays U.S. Aggregate Bond Index - A broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass throughs), ABS, and CMBS.

MSCI World Index - MSCI's market capitalization weighted index is composed of companies representative of the market structure of 23 developed market countries in North America, Europe, and the Asia/Pacific Region. An investor cannot invest directly in an index.

Basis Point - One hundredth of a percentage point (0.01%).
